## **SECTION 4 – FIRST AID MEASURES**

### EYE CONTACT:

EYELID BONDED CLOSED: Do not force open. Get immediate medical attention.

EYELID ABLE TO OPEN: Hold the eyelid open while rinsing thoroughly but gently with water for 15 minutes. Get immediate medical attention. Do not use any solvents to flush the eye and its surroundings.

Adhesive may sting the eye temporarily. Solidified adhesive may cause a corneal abrasion and should be treated by a medical professional.

### SKIN CONTACT:

Do not pull skin apart. Use adhesive remover or acetone and carefully peel or roll apart. Cleanse and rinse skin thoroughly. Get medical attention if irritation persists.

In case of skin contact through clothing or large spills on skin- burns may occur. Get immediate medical attention.

### INGESTION:

Ensure breathing passageways are not obstructed. Unlikely to ingest due to the polymerization process of the product when in contact with moisture. If accidentally swallowed, immediately contact the local poison control center or emergency room for any other additional treatment directions.

### INHALATION:

Remove to fresh air. Get medical attention if irritation persists. If experiencing difficulty breathing, get immediate medical attention.

## **SECTION 5 – FIRE-FIGHTING MEASURES**

### GENERAL FIRE HAZARDS:

See Section 9 for Flammability Properties.

Keep away from heat and flame.

### HAZARDOUS COMBUSTION PRODUCTS:

Oxides of carbon.

### SUITABLE EXTINGUISHING MEDIA:

In case of fire: Use water spray, dry chemical, foam or CO2. Use water to keep fire-exposed containers cool.

### UNSUITABLE EXTINGUISHING MEDIA:

None.

#### FIRE FIGHTING EQUIPMENT / INSTRUCTIONS:

Firefighters should wear full protective gear.

### **SECTION 6 – ACCIDENTAL RELEASE MEASURES**

#### RECOVERY AND NEUTRALIZATION:

Stop the flow of material, if this is without risk.

#### MATERIALS AND METHODS FOR CLEAN-UP:

Eliminate all ignition sources. Soak up with absorbent material (do not use cloths) or polymerize slowly with water at a 10 water : 1 adhesive ratio and scrape up. Remove to a chemical disposal area.

#### EMERGENCY MEASURES:

Isolate area. Keep unnecessary personnel away.

#### PERSONAL PRECAUTIONS AND PROTECTIVE EQUIPMENT:

Wear suitable respiratory protection (EN405, FFA2, or EN140 A2). Wear polyethylene or polypropylene gloves. Use eye protection (BS EN 166). Wear suitable protective clothing.

#### ENVIRONMENTAL PRECAUTIONS:

Prevent entry into natural bodies of water.

#### PREVENTION OF SECONDARY HAZARDS:

None.

### **SECTION 7 – HANDLING AND STORAGE**

#### HANDLING PROCEDURES:

Handle in accordance with good industrial hygiene and safety practices. Avoid inhalation of vapour. Ensure adequate ventilation and use local vapour extraction. Avoid unnecessary exposure and removal of the product from eyes, skin and clothing. Wash thoroughly after handling.

#### STORAGE PROCEDURES:

Keep away from amines. Store in a cool, dry area away from sun and heat. Keep containers tightly closed and labelled. Exposure to small amounts of moisture, even moisture in air, causes polymerization and renders the product unusable. Keep away from heat, sparks, flames, and other sources of ignition.

#### INCOMPATIBILITIES:

Water, alcohols, amines, bases, cotton-based products, and direct UV.

## SECTION 8 – EXPOSURE CONTROLS/PERSONAL PROTECTION

### ENGINEERING MEASURES:

If airborne contaminants are generated when the material is heated or handled, sufficient ventilation in volume and air flow patterns should be provided to keep air contaminant concentration levels below acceptable criteria.

### PERSONAL PROTECTIVE EQUIPMENT:

**RESPIRATORY:** If airborne concentrations are above the applicable exposure limits, wear suitable respiratory protection (EN405, FFA2, or EN140 A2).

**HANDS:** Wear polyethylene or polypropylene gloves.

**EYES:** Use eye protection if contact is likely (BS EN 166).

**SKIN AND BODY:** Wear suitable protective clothing (chemical resistant). Avoid cotton clothing.
